

What Professionals are Saying About *The Hidden Story of Cancer:*

“I think your book *“The Hidden Story of Cancer”* is the most important book to be written in the last hundred years. I am also trained in the analytical sciences and have read much of the nonsense you so eloquently discredit. There had to be a “connect-the-dots” formula but it was elusive until I started your book. A few pages in, I sat upright and paid attention. **Sir, you *have connected the dots and should receive your own Nobel Prize for medical investigation. I, and the world at large, owe you a debt that can never be repaid in simple words of thanks.*”**

– Thomas Somerville

“I had been taking high-dose fish oil for many years in an attempt to prevent C-V disease and retard inflammation. However, I noticed that my fasting blood sugars were always in the high range (100-115) and measurements of oxidative stress also reflected high levels. ***No one could explain it*** since my hemoglobin a1c always stayed low. **Since switching to the parent EFAs (PEOs), as recommended in *The Hidden Story of Cancer*, my FBS came down to 84. My lipids also looked better than ever. *I think many of our colleagues do not appreciate the dangers of high dose fish oil.*** Derivative EFAs like fish oil easily oxidize, and although some surrogate markers may improve, the final cost is still unknown. Thanks so very much for your book.”

“To save your health and your life you must read this book. This information has transformed me, my practice and my patients. I have followed the information on essential fats for the past 25 years, but my patients did not see the results that the researchers reported. The discovery in this book makes sense and finally patients are reporting improvements. **I hope other physicians will become aware of this groundbreaking information.”**

– David Sim, M.D.

“Physicians and their patients around-the-world owe you a big ‘thank you.’ As a family and integrative physician, I carefully read your book and articles paying close attention to your references. I am an enthusiastic supporter of your program. Dr. Atkins’ first book started me on this path and you provide the missing information – the missing links and scientific support – that eluded Dr. Atkins. I am strongly recommending this book to all my patients.”

“I’ve been studying health and nutrition for over 25 years. Your book is knocking my socks off! It is indeed the greatest book on health and nutrition I have ever read. People don’t believe me when I tell them that even something as complicated as cancer – and other degenerative diseases – have such a simple solution. ‘Well, just read Brian Peskin’s book, *The Hidden Story of Cancer*, and find out for yourself,’ is what I tell them. I can’t put it down, it is *that* interesting and informative!”

“Impeccable research and novel insights of sheer genius. Brian’s accomplishment is singular—no groups, no public money, only elegant science showing how proper use of EFAs is the missing link for practical application of Otto Warburg’s discovery. This knowledge is priceless for your future health.”
